

Fire Control Panel 2 Zone (Conventional)
FR01

- 2 Loop conventional fire control panel for monitoring fire detection equipment
- An analogue system that can be used with all 24VDC auxiliary fire, smoke and heat detection equipment
- Each zone supports up to 20 or 32 detectors or call points - series dependant
- Remote reset and delay inputs
- Four sounder outputs
- 24VDC Auxiliary output
- Fault and alarm output relays

Fire Control Panel 4 Zone (Conventional)
FR01-1

- 4 Loop conventional fire control panel for monitoring fire detection equipment
- An analogue system that can be used with all 24VDC auxiliary fire, smoke and heat detection equipment
- Each zone supports up to 20 or 32 detectors or call points - series dependant
- Remote reset and delay inputs
- Four sounder outputs
- 24VDC Auxiliary output
- Fault and alarm output relays

6
Fire Control Panel 8 Zone (Conventional)
FR01-2

- 8 Loop conventional fire control panel for monitoring fire detection equipment
- An analogue system that can be used with all 24VDC auxiliary fire, smoke and heat detection equipment
- Each zone supports up to 20 or 32 detectors or call points - series dependant
- Remote reset and delay inputs
- Four sounder outputs
- 24VDC Auxiliary output
- Fault and alarm output relays
